# Assignment-1 part-2

## OLD WEBPAGE:

## Comparison of Old and New Components for 123Movies Website

### Old Components:

#### 1. Background

Old: Plain background with no image.

New: Background image added (movies.jpg) with properties set to cover, no-repeat, and fixed attachment.

#### 2. Header

Old: Header with navigation links.

New: No change in structure, only background color set to `rgba(0, 0, 0, 0.7)` for better readability against the background image.

#### 3. Main Content

Old: Welcome message and a brief description.

New: Added a search bar in the center for user convenience.

Additional features section with links to top-rated movies, new releases, genres, user reviews, and upcoming movies.

#### 4. Footer

Old: Footer with copyright notice.

New: No change in structure, only background color set to `rgba(0, 0, 0, 0.7)` for better readability against the background image.

## **Justification for Changes**

### **Comparison of Old and New Components for 123Movies Website**

#### **1. Background Image**

Reason: Enhances visual appeal and provides a cinematic feel, aligning with the website's theme.

Impact: Creates a more engaging and immersive experience for users.

#### **2. Search Bar**

Reason: Facilitates easy and quick access to search functionality, improving user experience.

Impact: Increases user interaction by making it simpler to find desired movies or series.

#### **3. Additional Features Section**

Reason: Provides quick links to essential sections, encouraging users to explore more content. –

Impact: Enhances website navigation and keeps users engaged by offering more options directly from the main page.
